Hi everyone,
Thats my first animation buid in HTML, CSS and JS.
There ara four states witch you can change by clicking on the cards.
These states are:
1) Cards are assembled into cube (animation of cube is stoped)
2) Cards are still assembled into cube and cube is rotating in 3D
3) Animation is stopped and cube is turning back to the start position
4) Cards being unfolded from cube to plain position

Just download folder with files and open index.html in your browser.
